UPDATE - BAY BRIDGE TOWER BASE ANCHOR RODS TESTING

SACRAMENTO – In this Caltrans News Flash, Bay Bridge spokesperson Leah Robinson-Leach takes you behind the scenes to give you an update on Tower Base Anchor Rods Ultrasonic Testing. Globally recognized experts are meticulously performing ultrasonic testing of anchor rods inside the Tower Base of the Bay Bridge. She talks to Mike Foerder, Senior Inspector with Materials Engineering and Testing Services, about how inspectors facilitate the testing. Watch as equipment and rods go through preliminary testing preparation before going out to the Tower Base for Ultrasonic Testing to accurately measure and verify the length of the hundreds of rods anchored in the Tower Base.
